

CERTIFICATE

Certified Passive House Component

Component-ID 2257wm03 valid until 31st December 2024

Passive House Institute
Dr. Wolfgang Feist
64283 Darmstadt
Germany

Category: **Window mounting system**

Manufacturer: **LLC «OLIS»,
Kyiv,
Ukraine**

Product name: **VSThermo VST 80x90**

**This certificate was awarded based on the following
criteria for the cool, temperate climate zone**

Efficiency $\Delta U \leq 0.05 \text{ W}/(\text{m}^2 \cdot \text{K})$

Hygiene $f_{\text{Rsi} = 0.25} \geq 0.70$

cool, temperate climate

**CERTIFIED
COMPONENT**

Passive House Institute

Description

Pre-wall mounting system from dense EPS foam [0,040 W/(mK)], 80×90 mm. Assembly by glueing and screwing. Additional thermal losses by screws determined by 3D heat flux simulation. Losses are included in the conductivity of the EPS-foam.

Explanation

The certifiability is demonstrated by the increase of the heat transfer coefficient ΔU [W/(m²K)] caused by the installation thermal bridge (efficiency criterion) in conjunction with given installation situations and window frames as well as by the minimum temperature factor at the coldest point of the installation connection (hygiene criterion).

The heat transfer coefficients (U-values) and the thermal bridge loss coefficients (ψ -values) of the window are determined on the basis of DIN EN ISO 10077-2, the installation thermal bridges according to ISO 10211.

The Passive House Institute has defined international component criteria for seven climate zones. In principle, components which have been certified for climate zones with higher requirements may also be used in climates with less stringent requirements. In a particular climate zone it may make sense to use a component of a higher thermal quality which has been certified for a climate zone with more stringent requirements.

Further information relating to certification can be found on www.passivehouse.com and passipedia.org.

Validated installations

| Frame values | | Frame width b_f mm | U -value frame U_f W/(m ² · K) | Ψ -glazing edge Ψ_g W/(m · K) | Temp. Factor $f_{Rsi=0.25}$ [-] |
|------------------------|---|----------------------------|---|---|---------------------------------------|
| Bottom | (OB1)  | 125 | 0.73 | 0.036 | 0.73 |
| Top | (OH1)  | 125 | 0.73 | 0.036 | 0.73 |
| Lateral | (OJ1)  | 125 | 0.73 | 0.036 | 0.73 |
| Spacer: PHI phB-Spacer | | | Secondary seal: Polysulfide | | |
